Summary

Solutions Architect with 5+ years across cloud, data and software, on AWS and Azure. I design secure cloud foundations, migrate data platforms, and automate the infrastructure that runs them, from multi-account CI/CD pipelines to IoT at the edge. AWS Certified Solutions Architect and DevOps Engineer – Professional. Before consulting, I co-authored two research papers at IDLab – imec and built `pyRDF2Vec`, a library widely cited by the research community. In my free time, I enjoy chess, piano, cycling, and writing.

Experience

Partenamut — CBTW Consultant — *Brussels, Belgium*

Solutions Architect — *March 2026 - Present*

- Designed cloud architectures on AWS and Azure for CBTW clients and contributed to RFP responses.
- Built a multi-account CI/CD pipeline factory with AWS CDK and CodePipeline, and a central monitoring platform across accounts.
- Put AI document processing into production with Amazon Textract and Bedrock, orchestrated by AWS Step Functions.
- Loaded 18 tables daily into Amazon Redshift.
- Utilized AWS CDK, CodePipeline, Step Functions, Lambda, Textract, Bedrock, Redshift, S3, and Terraform.

Deloitte — *Zaventem, Belgium*

Solutions Architect — *December 2025 - January 2026*

- Designed cloud platform proposals for clients, with secure AWS & Azure Terraform modules and starter kits (e.g., EKS and serverless applications) to accelerate cloud adoption and ensure compliance with security best practices.
- Conducted security reviews and implemented guardrails to maintain a secure cloud environment across multiple projects.
- Collaborated with development teams to optimize cloud architecture patterns and improve deployment processes.
- Utilized AWS, Azure, and Terraform.

Sparkle — Nemeon Consultant — *Kontich, Belgium*

Azure Data Engineer — *October 2025 - November 2025*

- Designed and implemented a Python-based document summarization solution for civil engineering technical documents related to water gate infrastructure, processing documents from Azure Blob Storage where files were identified by hashed names.
- Used Azure Foundry with GPT-5 mini to generate document summaries, returning JSON outputs containing token counts and confidence scores for LLM-generated content.
- Developed data integration pipelines to read and cross-join multiple Excel files from various sources (including Madam and Google Drive samples), enriching document context before summarization.
- Engineered a containerized Python solution deployed as part of an Azure pipeline, ensuring reliable and scalable processing of technical documentation.
- Utilized Python, Azure Blob Storage, Azure Foundry, GPT-5 mini, Docker, and Azure Pipelines.

Logistics Clients — Nemeon Consultant — *Kontich, Belgium*

Solutions Architect — *August 2025 - November 2025*

- Designed and implemented Microsoft Fabric environments for more than five logistics clients.
- Built and optimized data pipelines to ingest and process data from Boltrics and TAS environments, ensuring data integrity and performance.
- Implemented data governance and quality frameworks within Microsoft Fabric to maintain data reliability across logistics operations.
- Utilized Microsoft Fabric, Azure Data Factory, SQL, and data modeling techniques.

Envalior (Former DSM) — Nemeon Consultant — *Geleen, Netherlands*

Solutions Architect — *January 2025 - August 2025*

- Migrated, in a team of eight, Envalior's data platform (around 30 business use cases) from DSM's AWS environment to Envalior's new landing zone, without disrupting operations.
- Moved the data, compute, and infrastructure of each use case, ensuring data integrity and infrastructure consistency throughout the migration.
- Applied the Scrum framework throughout the migration lifecycle.
- Utilized AWS CDK, AWS CloudFormation, AWS CodePipeline, AWS Lambda, AWS Glue, AWS Secrets Manager, Amazon S3, Amazon Athena, Python, PySpark, and CyberArk.

Envalior (Former DSM)

Nemeon Consultant — *Geleen, Netherlands*

AWS Cloud Developer — *September 2022 - December 2024*

- Implemented data provisioning for multiple SAP and B&W tables using Theobald jobs and AWS Glue jobs and crawlers for the raw, cleansed, and harmonized layers at the CDK level, enhancing data quality and availability for reporting and finance squads.
- Led the migration of four manufacturing plants to AWS IoT Greengrass V2, leveraging CDK, GNU/Linux, and Docker.
- Enhanced Microsoft SQL Server and OPC UA implementations for data collection from AspenTech, Siemens, and WonderWare servers.
- Orchestrated data processing workflows with AWS Step Functions, Lambda, Glue, and S3.
- Supported junior engineers through code and IaC reviews, and contributed to the AWS Guild to resolve AWS-related challenges.
- Utilized AWS IoT Greengrass, AWS Glue, AWS Lambda, AWS Step Functions, AWS CDK, AWS CodePipeline, AWS Secrets Manager, Amazon S3, Amazon Athena, Python, PySpark, GNU/Linux, Docker, CyberArk, and Theobald Software.

SoccerLAB

Nemeon Consultant — *Hasselt, Belgium*

Software Engineer — *August 2022 - September 2022*

- Conducted a Proof of Concept to evaluate the performance and stability of Svelte compared to React and Angular.
- Applied the Atomic design methodology to improve the development of the User Interface, increase stability, and enhance the consistency of the digital experience.
- Created component documentation using Storybook.
- Utilized Svelte, SvelteKit, TypeScript, Storybook, Tailwind CSS, Carbon Design System, Jira, and Bitbucket in project work.

Datavillage

Nemeon Consultant — *Liège, Belgium*

Data Scientist — *January 2022 - April 2022*

- Evaluated Knowledge Graphs based on metrics such as purity rate, deployment time, usage, and cost.
- Conducted a Knowledge Graph migration to enhance the recommendation system for end users.
- Improved the recommendation system performance by minimizing HTTP latency related to SPARQL queries and reducing the algorithmic complexity of Cypher queries and Python implementations.
- Provided recommendations for improving the implemented AWS Cloud architecture.
- Utilized Python, Jupyter Notebook, Neo4j, DBpedia, Wikidata, and Git in project work.

IDLab – imec

Ghent, Belgium

Machine Learning Intern — *February 2021 - June 2021*

- Developed `pyRDF2Vec`, a state-of-the-art API to facilitate development in the scientific community, choosing appropriate architecture and design patterns, as well as the implementation of linters, Continuous Integration (CI), Continuous Delivery (CD), and Continuous Testing (CT).
- Improved the processing time of Knowledge Graphs by introducing optimization mechanisms such as the use of cache memory to reduce HTTP latency, multiprocessing, cache prefiling, and the use of appropriate data structures and a connection pool.
- Added basic literal support to increase the model accuracy.
- Developed an online learning solution to prevent the need for complete retraining of the model on the Knowledge Graph, but only update with new data added to the Knowledge Graph.
- Implemented and evaluated BERT and other recent embedding techniques within RDF2Vec as part of my Master's thesis.
- Utilized Python, Jupyter Notebook, Google Colab, LaTeX, Mattermost, and Git in project work.

Open Summer of Code

Brussels, Belgium

Developer (Student Job) — *July 2020 - August 2020*

- Developed a web application that uses `RML.io` to generate high-quality Linked Data for creating Knowledge Graphs.
- Led a student team in the execution of the project.
- Utilized React, Node.js, JavaScript, Docker, Slack, and Git in project work.

Open Summer of Code

Brussels, Belgium

Developer (Student Job) — *July 2018 - August 2018*

- Developed the web application of Prisma, which has since become `Soulcenter`.
- Utilized JavaScript, Vue.js, Laravel, Slack, and Git in project work.

Centre de Recherche de la Haute École en Hainaut (CReHEH)

Mons, Belgium

Trainee Developer — *February 2018 - May 2018*

- Designed an API and a CLI for the Haute École en Hainaut as part of my Bachelor's thesis.
- Enhanced visual recognition and motion of the NAO robot through image processing.
- Created interaction scenarios with the NAO robot to engage with vulnerable children (e.g., children with autistic and behavioral disorders).
- Utilized Python, OpenCV, and Git in project work.

Publications

pyRDF2Vec: A Python Implementation and Extension of RDF2Vec

Springer Nature Switzerland

Gilles Vandewiele, Bram Steenwinckel, **Terencio Agozzino** & Femke Ongenae — *May 2023*

Certifications

2026	**Microsoft Certified: Azure Administrator – Associate (AZ-104)**, Microsoft	*98B6957B2AFF0807*
2024	**AWS Certified DevOps Engineer – Professional (DOP-C02)**, Amazon Web Services (AWS)	*AWS02487783*
2023	**AWS Certified Solutions Architect – Professional (SAP-C02)**, Amazon Web Services (AWS)	*AWS02487783*
2023	**Microsoft Certified: Microsoft Azure Data Fundamentals (DP-900)**, Microsoft	*EFEA16025A011943*
2022	**Microsoft Certified: Microsoft Azure AI Fundamentals (AI-900)**, Microsoft	*5E5B68B771431084*
2022	**Professional Scrum Master™ I (PSM I)**, Scrum.org	*827516*
2022	**AWS Certified SysOps Administrator – Associate (SOA-C02)**, Amazon Web Services (AWS)	*AWS02487783*
2022	**AWS Certified Developer – Associate (DVA-C01)**, Amazon Web Services (AWS)	*AWS02487783*
2021	**AWS Certified Solutions Architect – Associate (SAA-C02)**, Amazon Web Services (AWS)	*AWS02487783*
2021	**Microsoft Certified: Azure Fundamentals (AZ-900)**, Microsoft	*C2F2056E74C434F*
2021	**AWS Certified Cloud Practitioner (CFL-C01)**, Amazon Web Services (AWS)	*AWS02487783*
2021	**SCO-VCA**, BeSaCC-VCA	*BE000132FR205386*

Skills

Cloud & Security	AWS · Azure · Landing Zones · IAM · Security Guardrails · IoT Greengrass
IaC & CI/CD	AWS CDK · CloudFormation · Terraform · CodePipeline · GitHub Actions · Docker
Data	AWS Glue · Step Functions · Redshift · Athena · Microsoft Fabric · Azure Data Factory · PySpark · SQL
AI & Research	Amazon Bedrock · Machine Learning · NLP · Knowledge Graphs · PyTorch
Programming	Python · TypeScript · Bash · Java · C#
Languages	**French:** native | **English:** fluent | **Dutch, Italian:** basic

Education

Haute École en Hainaut (HEH) — *Mons, Belgium*
Master, Computer & Systems Engineering — *September 2018 - June 2021*

Haute École en Hainaut (HEH) — *Mons, Belgium*
Bachelor, Networks and Telecommunications — *September 2015 - June 2018*

Université de Mons (UMons) — *Mons, Belgium*
Bachelor, Computer Science — *September 2013 - June 2015*

Honors & Awards

2021	**Honorable Mention**, 7th Cyber Security Challenge Belgium	*Brussels, Belgium*
2020	**Honorable Mention**, 6th Cyber Security Challenge Belgium	*Brussels, Belgium*
2020	**Honorable Mention**, 3rd WIRE.HACK Hackathon	*Kortrijk, Belgium*

Presentations

3rd Edition of the Cybersecurity Day by the Haute École en Hainaut — *Mons, Belgium*
Presenter for <BERT is All You Need> — *December 2020*
- Introduced RNN, the Transformer architecture, and BERT.

2nd Edition of the Cybersecurity Day by the Haute École en Hainaut — *Mons, Belgium*
Presenter for <New Vulnerabilities in 4G/5G Networks> — *December 2019*
- Provided an overview of User Equipment (UE), Evolve NodeB (eNodeB), and Mobility Management Entity (MME) device types.
